### PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science undergraduate seeking entry-level opportunities to apply and expand skills in Java programming, web development, and machine learning. Gained practical exposure through academic projects and internships, with a strong interest in building real-world solutions. Committed to continuous learning and contributing meaningfully to a dynamic tech environment.

### SKILLS

- Programming Languages:** Java, C++
- Frameworks & Technologies:** Spring Boot, Spring, JPA, Hibernate, FastAPI
- Web Development:** HTML, CSS, JavaScript, RESTful APIs
- Database:** SQL, MySQL, MongoDB
- Core Concepts:** Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Backend Development, API Integration, Full-Stack Development, Data Processing
- Machine Learning:** Logistic Regression, Feature Engineering, Model Evaluation
- Tools:** Git, GitHub, MS Office
- Soft Skills:** Problem-Solving, Communication Skills, Teamwork & Collaboration, Adaptability

### EXPERIENCE

- Coditas Solutions LLP, Associate Software Engineer** 01/2026 – Present | Pune
- Developing and debugging Java-based backend applications using Spring Boot, following industry-standard coding practices.
  - Implementing RESTful APIs and backend services to support scalable web applications.
  - Utilizing Git and GitHub for version control, enabling efficient code collaboration, branching strategies, and pull request workflows. Participating in code reviews, debugging sessions, and performance optimization to improve application reliability and maintainability.
  - Gaining hands-on experience with Spring Boot architecture, dependency injection, and REST API development in an agile development environment.

### PROJECTS

- FoodLens – OCR-Based Food Safety Analysis System,** 03/2026  
*Tech Stack: Python, Tesseract OCR, FastAPI, React Native, MongoDB, REST APIs*
- Engineered a **full-stack OCR-based mobile application** for **real-time food label analysis** and **allergen detection**.
  - Implemented **high-accuracy text extraction** using Tesseract OCR for efficient ingredient parsing.
  - Developed a **scalable FastAPI backend** with **API integration (Open Food Facts)** for ingredient validation and risk analysis.
  - Built a **cross-platform React Native interface** for seamless image capture and user interaction.
  - Designed a **rule-based classification system (SAFE / CAUTION / AVOID)** using user health profiles.
  - Optimized **data processing pipelines and API handling**, improving performance and real-time detection reliability.
- Machine Learning-Based Traffic Accident Risk Prediction System,** 12/2025  
*Tech Stack: Python, Logistic Regression, Flask, HTML, CSS, JavaScript, PHP, MySQL, REST APIs, Pandas, NumPy*
- Developed a **scalable traffic risk prediction system** using **real-time sensor and environmental data**.
  - Implemented a **Logistic Regression model** with **data preprocessing and feature engineering** for accurate predictions.
  - Built **secure authentication workflows using PHP** to ensure **data security and access control**.
  - Designed a **responsive frontend (HTML, CSS, JavaScript)** with **data visualization**.
  - Integrated a **Flask backend with RESTful APIs** for **real-time prediction**.
  - Optimized **data processing pipelines** to improve **accuracy and reduce latency**.

### EDUCATION

- Bachelor of Technology, SRKR (HONORS)** 2024 – 2026 | Bhimavaram  
Major-Data Science
- Bachelor of Technology, SRKR** 2022 – 2026 | Bhimavaram  
Major - Computer Science And Engineering  
CPGA - 8.8
- XII(PCM), Subhaniketan School (CBSE)** 2020 – 2022 | kakinada  
Percentage- 76
- 10th Grade, Saranya Concept School (CBSE)** 2019 – 2020 | Kakinada  
CGPA - 9.2

### PROFESSIONAL CERTIFICATIONS

- Google Cloud Platform (GCP), Google**
- Generative AI for All- Infosys (On Wingspan), Infosys**
- Certification in C, CPP, Python, Cisco**
- Java Full Stack Internship, Eduskills**
- Short-term intership in AI-ML-DS, IIDT**
